

March 5-6, 2013

Sydney, Australia

The Total Condenser Performance™ Workshop

Everything you ever wanted to know about condenser efficiency, reliability and longevity but didn't know who to ask!

Meet the industry experts to learn and discuss the performance and upgrade aspects of your condenser & balance of plant heat exchangers in this highly informative and interactive workshop.

Take away ideas to improve fuel costs, emissions and carbon tax savings while maximising megawatt output and plant availability.

Register Now, Space is Limited!

The Total Condenser Performance™ Workshop

Achieving the perfect balance of condenser efficiency, reliability and longevity is attainable through effective cleaning, testing and repairing. With this in mind, the **Total Condenser Performance™ Workshop** is designed to help you maximize megawatt output and minimize risk of condenser related forced outages during your operating cycle.

The **Total Condenser Performance™ Workshop** includes valuable information on tube cleaning, eddy current testing, leak detection procedures, retubing, coatings and tube material selection, when executed together or independently can help you achieve the best results from your condensers and balance of plant heat exchangers.

- Meet Industry Experts
- Have all your condenser questions answered in one place
- As seen at EPRI and ASME
- Speakers from Conco, Retubeco and Plymouth Tube

Dates: Tuesday, March 5 & Wednesday, March 6, 2013

Workshop Fee: \$355.00 + GST

Venue: Holiday Inn Sydney Airport
Corner Of Bourke Road & O'riordan Street, Sydney
